These products are widely used in various industries like agriculture, construction, medical and packaging as well as households. In addition to this, for meeting the diverse requirements of our clients, we provide customization as per the specifications laid down by them.*

Our professionals also work in proper coordination with the customers for knowing their demands and requirements in a better way. We also have a team of expert quality controllers, which stringently checks all finished products on different parameters to assure flawlessness.

Quality

We are a quality-conscious organization, wherein all endeavors are directed towards achieving the highest standards in all products. For this purpose, we manufacture all our products using high-grade raw material like PP granules that are procured from the certified and reliable vendors of the market. In addition to this, for carrying out checking process in an accurate manner, we have developed

an in-house quality testing laboratory. Equipped with latest technology & instruments, our lab is managed by a team of expert quality controllers, which utilizes all the available resources for testing the final output on certain parameters to ensure flawlessness.

“Oasis” is committed to achieve customer satisfaction through adherence to quality systems and continual improvement activities for delivering timely, cost effective quality products

Products:

Non Woven Bags

We offer polypropylene made Non Woven Bags with D -cut, U-cut shape, loop handle, box type, which are widely used for shopping, packing and brand promotion purpose. These types of bags are commonly used in retail shops or supermarkets for their attractive matte or gloss laminated finishing and durable quality. Usually, heat transfer or silk screen printing method is adopted to print logo or image on the surface of these carry bags. Accessible in different color and size options, these types of bags are truly convenient to carry a number of items like clothes, edible items and so on. Advanced ultrasonic stitching of these Non Woven Bags prevents fall of packed items during their relocation.

Features:

The offered carry bags are made of Eco friendly polypropylene material These bags are light in weight and are easy to carry Being non toxic, these bags are biodegradable Tear and moisture proof quality.

D-Cut Bags

Our exclusive collection of Non Woven D Cut Bags is must when you step out of your home, for shopping. Crafted from durable non woven material, these bags feature single pocket and double handle strap for easy carrying. Good for daily use, these are great for supermarkets, shops, markets, trade shows, stalls, boutiques and gifts. We offer these bags to clients in different colors and sizes for meeting their individual needs.

W- cut Non Woven carry bags

These W Cut Non-Woven Carry Bags are eco-friendly alternative to plastic bags. High in demand for use in grocery stores, super markets and bakery shops, these carry bags come with large gussets which greatly increase the capacity of the bags. Very handy to use, these bags are available in a variety of colors, designs and sizes to meet their individual requirements.

Needlepunch Fabrics

We provide superior quality **Needle Punched Nonwovens** that are manufactured using premium raw materials. We are well established as one of the pioneer Geotextiles suppliers, based in India. Our nonwoven fabrics are in huge demand in the global markets and are offered at affordable prices within the stipulated time frame.

Geotextile fabrics are available in both Polypropylene Staple Fibers and Polyester Staple Fibres. The fibres are needled to form a network that retains dimensional stability relative to each other. The geotextile is resistant to biological and chemical environments normally found in soils.

Non Woven Medical fabrics

we are offering our valuable clients broad range of Medical Fabrics. These are extensively used for medical purposes. This product is used for making gowns and

drapes as they are soft by nature. Our product range is fabricated at our high end manufacturing unit using high quality raw material with latest technology. In addition, our clients can avail these at market leading prices.

Commercial applications:

- *Face mask*
- Galosh
- Shoe covers
- Bed linen in hospitals
- Curtains
- Surgical drapes and wraps
- *Gowns or gauzes*

Application

1. Shopping and Packaging bags
2. Agriculture
3. Mattress and Furniture
4. Shoe Interlining and Filtration

1. Shopping and Packaging bags – Our fabric is widely used in shopping bag and packing material due to its unique characteristics. Non-woven fabric is environment friendly fabric.

2. Agriculture – Non Woven Agriculture Products offered by us are developed using polypropylene, which is considered to be the most economical and eco-friendly polymer by spinning the material into filaments and bonding them by heat without use of any binders. These are light-weight with 17 to 19 grams per square meter. The Fabric ensures protection against the sun's rays due to UV absorbers/Stabilizers, which are incorporated in it.

The fabric provides protection against the sun's rays by enhancing early growth and development of plant with end result of both improvement in quality and yield. These protect the plant from cold and frost trapping 5 degree Celsius moisture that enables natural frost protection of plant. It minimizes the dangers caused by hail, heavy rains and storms.

3. Mattress and Furniture – Non-woven fabrics have a great demand in furniture and upholstery. In furniture before the fabric is put on the padding, a layer of Spun Bond Fabric is put to hold the padding. It is also used in carpets.

4. Shoe Interlining and Filtration – Our fabric is widely used in Shoe industries. These P P spunbond non woven fabrics is widely used as an interlining in Shoe Industry for making shoe uppers.
